

Manual Installation Guide for the PCCTools Plugin in BricsCAD

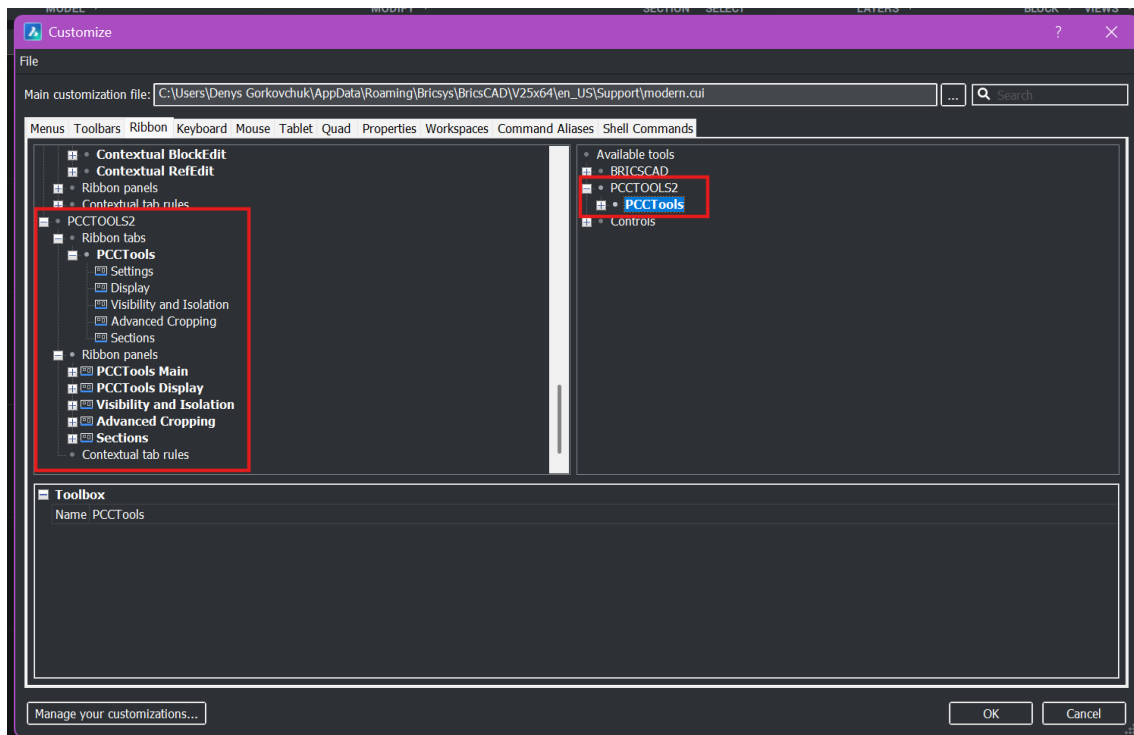

1 Unpack the Archive

2 Load the Partial CUI File

1. **Launch BricsCAD.**
2. In the command line, enter: **CUI**
3. In the **Customize User Interface** dialog, choose **File → Load Partial CUI File...**

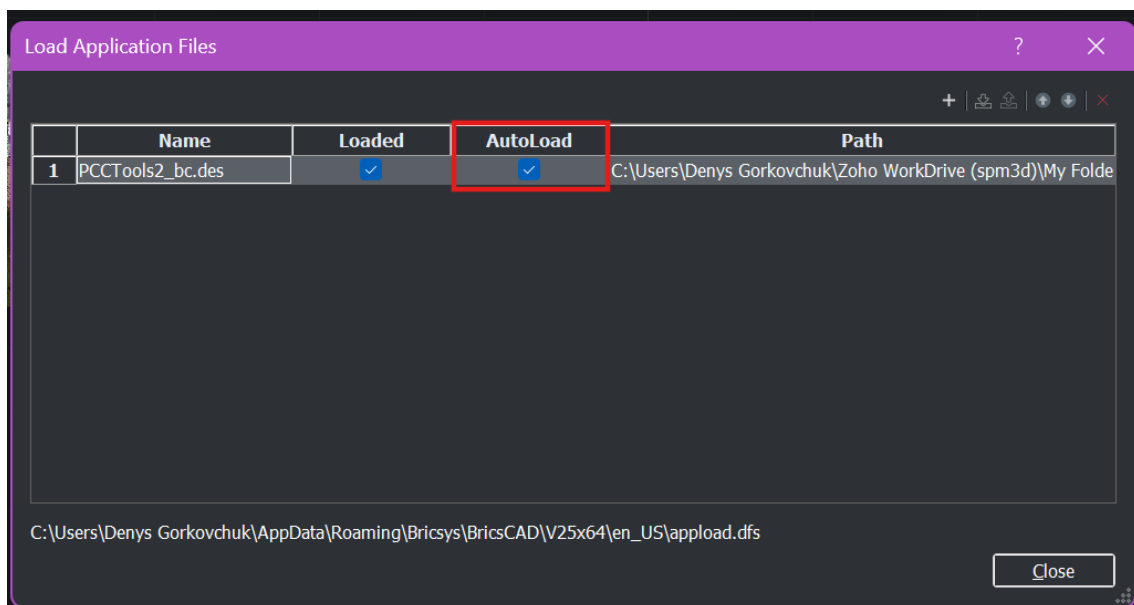

4. **Browse** to your unpacked folder and select **BC_PCCTools2.cui**
5. Click **Open**.
6. Confirm that the new tool panels and the “PCCTools” ribbon tab appear in the interface.

3 Configure Automatic Plugin Loading

1. In the command line, enter: **APPLOAD**
2. In the **Load/Unload Applications** dialog, click the **Add...** button (+).
3. **Select** the file: PCCTools2_bc.des from your unpacked folder.
4. Click **Open**.

5. Check **“AutoLoad”** checkbox. This ensures PCCTools loads automatically every time BricsCAD starts.
